

# PROALYPTICS

## IMPROVE THE FLOW OF TRAFFIC AND INCREASE EFFICIENCY

By monitoring and providing a real-time dashboard, you gain insight in the traffic flow at your eco-station, helping you to plan and inform better, to increase efficiency.

### Visitor checks the website.

Visitors determine the best time to visit the eco-station. By checking the real-time queue and waiting time website.

### Visitor arrives.

The Proalytics Smarthost detects smart devices with its directional antenna and collects queue information.

### Data analysis.

The Proalytics Smarthosts analyses and anonymizes the data and sends it to the Proalytics Cloud. 100% GDPR / PIPEDA compliant.

### Visitor is on premise.

Visitors are inside the facility. Proalytics counts the visitors on premise.

### Visitor leaves.

Proalytics calculates the dwell time of the visit and provides real-time information for other visitors.

### Consolidated site info

The Proalytics dashboard generates clear site information regarding its visitors.
